

Energy auditing in practice

3-day workshop Nationwide

The only training course that combines the opportunity to learn auditing fundamentals with the chance to conduct a supervised energy audit on a practical site visit.

- Learn practical and theoretical elements of energy auditing
- Get up to date with details of relevant legislation
- Examine energy management principles
- Carry out a site audit alongside expert instructors
- Analyse the data and learn how to prepare an itemised and prioritised audit report

What does the workshop cover?

Day 1 – Fundamentals, including a background to auditing, energy management principles, legislation, benchmarking and estimation auditing.

Day 2 – Site visit including carrying out an actual audit and gathering relevant data.

Day 3 – Analysis and output including analysing data, life cycle analysis, creating an audit report and purchasing policies - preparing a strategy for your own organisation.

Who is this workshop for?

Anyone with an interest in managing energy usage within their organisation. Whether you are new to the field or interested in refining or refreshing your knowledge and methodology, this course is for you.

'An informative, comprehensive overview of energy auditing offering great value for money'- Charles Kee, Director, Green 2020

'Excellent content delivered at the right level' Peter Henderson, Managing Director, Utility Focus
