

Implementation of small scale renewables

One day Workshop
Beacon Energy, Loughborough, LE12 9YE

Set at the groundbreaking Beacon Energy centre - demonstrating renewable energy at work and how to implement small scale renewables within your organisation.

- Get a practical overview of the utilisation of small scale renewables
- See wind turbines, pv panels, fuel cells and many other technologies in action
- Find out about essential planning issues, current government legislation and grants available
- Start planning how to implement changes and improvement in your organisation with support from our expert speakers

Who is this workshop for?

If you're thinking about integrating renewable technologies in your organisation or just want to know more about smaller scale renewable energy then this course is for you.

Implementation of small scale renewables

Learning Outcomes

By the end of this course you will have:

- Knowledge of a range of renewable technologies and have seen these in action
- An understanding of the planning and legislative issues associated with installing renewable technologies
- The ability to identify opportunities for future installations or improve current installations in your organisation

Delegates will be provided with:

- Course materials including an action workbook
- Action plans for use at your organisation
- Tutors' presentations
- Report templates
- Reduced subscription rate to *Croner's Energy Management* publication
- Personal follow-up with the course tutor

£235.00 (+VAT) for members

£355.00 (+VAT) for non-members

You can join the Energy Institute for **£83** (VAT exempt)

You will leave this workshop with practical tools to employ small scale renewables within your organisation.
